EXECUTIVE SUMMARY

Passionate frontend engineer with backend knowledge and 2+ years of experience in developing responsive web applications using React, NextJS, and JavaScript. A quick learner with a strong appetite for creating user-centric software solutions from concept to successful development and collaborating with agile cross-functional teams.

SKILLS

- JavaScript | TypeScript | HTML | CSS | ReactJS | NextJS | NodeJS| TailwindCSS | Styled Components
- Unit Testing (Playwright) | Database Management (PostgreSQL, MongoDB) | RESTful APIs | Git | Material UI
- UI/UX | Adobe Photoshop | SEO | Figma | Jira | Agile Mangement | Storybook | Responsive Design | Vercel

WORK EXPERIENCE

FRONTEND DEVELOPER | Contract   Oct 2023 – Present
iv.roughlyai.com
- Co-developing with my former Program Head at British Columbia Institute of Technology an AI-powered full-stack NextJS TypeScript web app for users to ask questions and receive answers from uploaded PDFs
- Actively pursuing proficiency in Docker and AWS S3 cloud services to enhance the web app's scalability.

TECHNICAL STAFF II | Contract | British Columbia Institute of Technology   Aug 2023
bcit-timetable.vercel.app
- Led the successful early-stage development of a scheduling ReactJS web app to facilitate the process of creating schedules for students according to classes and instructors following the SDLC.
- Engaged in regular check-ins with project manager, addressing software bugs and implementing new features.
- Presented features to project stakeholder and identified feedback and project requirements.

WEB DEVELOPER | Contract | Vancouver Chinatown Foundation   July 2023 – Aug 2023
chinatownfoundation.org/light-up-chinatown
- Adapted webpage's functionality while incorporating provided content to promote a major event, leading to a significant 45% increase in website traffic within two months.
- Communicated regularly with marketing team to ensure project deliveries are to their satisfaction and goals.

FRONTEND DEVELOPER | Intern | Techies of Tomorrow   Apr 2023 – May 2023
electrumcharging.com
- Collaborated closely with senior developers to convert Figma design into UI reusable components for Electrum's interface, an electric mobility solutions company, enhancing overall team productivity and project outcomes.
- Actively participated in code reviews and resolved front-end issues for a seamless user experience, resulting in a 15% enhancement in code efficiency.
- Implemented 10+ unit tests to ensure a better user experience and resulting in a 20% improvement in overall application stability for a web application using ReactJS, JavaScript.

EDUCATION

BRITISH COLUMBIA INSTITUTE OF TECHNOLOGY – Burnaby, BC   Sept 2021 – June 2023
Diploma in Digital Design and Development – GPA 3.7
